

# MCLB ALBANY SAFETYGRAM

## NAVIGATING THE TRAFFIC CIRCLE

### Intersection Navigation

Pay close attention to the traffic signs and road markings.

Use turn signals, check mirrors, and look over your shoulder before changing lanes.

**A - Both lanes of W. Matthews entering the traffic circle from the industrial area must yield to traffic in the circle. The inside lane of the traffic circle may continue on the circle or proceed to the Main Gate. The outside lane of the traffic circle must proceed to the Main Gate.**

**B - The inside lane of the traffic circle cannot proceed on W. Matthews to the industrial area, but must stay in the traffic circle. The outside lane of the traffic circle has three options: 1) Continue on W. Matthews in the outside lane and turn north onto Slack St.; 2) Continue on W. Matthews to the industrial area; or 3) continue in the outside lane of the traffic circle to the Main Gate area.**

**C - Both lanes traveling north in the traffic circle must yield to traffic entering the circle from E. Matthews.**

**D - Traffic proceeding on E. Matthews to the Naval Branch Health Clinic, MCX complex area, or Lincoln Housing should stay in the far right lane. The center lane may either continue on the circle or proceed onto Walker Ave. The far left lane has the right of way to continue into the circle.**

**E - Traffic in the circle must yield to traffic on E. Matthews.**
